

I am a retiree, and my wife and I do extensive traveling. My xm radio, which was installed last December, is a Godsend. It provides end less hours of enjoyable music, and having news, weather, and traffic conditions available at a moments notice is very, very important,if at times not critical for me. Also, I am paying for this service, and the NAB shoud not have any control over my choice to use the features of xm radio.tom mclean
